3. Jan Havdahl, Harald Justnes THE ALKALINITY OF CEMENTITIOUS PASTES WITH MICROSILICA CURED AT AMBIENT AND ELEVATED TEMPERATURES	42
4. Stefan Jacobsen, Tom Farstad, Hans Christian Gran, Erik Sellevold FROST/SALT SCALING OF NO-SLUMP CONCRETE: EFFECT OF STRENGTH, AIR ENTRAINING AGENT AND CONDENSED SILICA FUME	57
5. Agnes Nagy, Sven Thelandersson MODELLING THERMAL EFFECTS IN YOUNG CONCRETE	72
6. Mats Emborg, Gustaf Westman, Stig Bernander RISKS OF THERMAL CRACKS IN BRIDGE COLUMNS DURING HYDRATION	90

PREFACE

The Research Committee of the Nordic Concrete Federation presents Volume 12 of the "Nordic Concrete Research", NCR 1993:1. It contains selected papers on concrete research carried out or concluded during 1991 in the five Nordic countries: Denmark, Finland, Iceland, Norway and Sweden.

The Research Committee has as one of its tasks to increase the professional contact between the concrete researchers in the Nordic countries and encourage contact between them and concrete scientists throughout the world. NCR is now published twice a year.

By arranging large Nordic Research meetings every third year and frequently arranging small thematic seminars, the contact between the Nordic countries is well established. We hope that the edition of NCR may act as a worldwide link between concrete scientists in the Nordic countries and the rest of the world.

This publication invites scientists, also outside the Nordic countries, to an open discussion on the papers presented. This discussion and the authors' replies will be presented in the next issue of NCR. Discussions relating to papers in this issue of NCR have to be sent to the Chairman of the Research Committee by April 1st 1993.

Göteborg, December 1992

Lars-Olof Nilsson
Chairman of the Research Committee

NORDIC CONCRETE FEDERATION
Research Committé
