## Preface

The Research Committee of the Nordic Concrete Federation has the pleasure of presenting Volume 14 of the Nordic Concrete Research, NCR 1994:1. It contains selected papers on concrete research carried out or concluded during 1993 in the five Nordic countries: Denmark, Finland, Iceland, Norway and Sweden.

One of the tasks of the Research Committee is to encourage young Nordic concrete scientists to publish themselves and to increase professional contacts between concrete researchers worldwide.

I invite concrete scientists, also outside the Nordic Countries, to an open discussion on the papers presented. This discussion and the authors' comments will be presented in the next issue of NCR, 1994:2. Replies to the articles in this volume have to be sent to me by September 1994 to the address on the opposite side.

Helsinki, April 1994

Klaus Söderlund

Chairman of the Research Committee
