## **Preface**

The Research Committee of the Nordic Concrete Federation has the pleasure of presenting Volume 15 of the Nordic Concrete Research, NCR 1994:2. It contains selected papers on concrete research carried out or concluded before 1994 in the five Nordic countries: Denmark, Finland, Iceland, Norway and Sweden.

One of the tasks of the Research Committee is to encourage also young Nordic concrete scientists to publish themselves and to increase professional contacts between concrete researchers worldwide.

I invite concrete scientists, also outside the Nordic Countries, to an open discussion on the papers presented. This discussion and the authors' comments will be presented in the next issue of NCR, 1995:1. Replies to the articles in this volume have to be sent to me by April 1995 to the address on the opposite side.
